DETAILED ACTION

Allowable Subject Matter

1. Claims 1-21 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Molnar et al. US PG Pub. 2002/0044614 disclose a system for reducing interference using co-channel interference mapping where an interference map is provided to identify dominant interference sources, and a desired signal is demodulated while canceling the identified interference. However, Molnar et al. does not disclose determining a dominant signal set for each signal of a plurality of received signals, and constructing a trellis comprising a plurality of paths from the dominant signal sets, where an optimal path is selected from the trellis for determining a symbol set represented by the optimal path.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Rohani et al. U.S. Patent 5,406,585 disclose a method for trellis decoding where a channel response of a desired user and interfering users are calculated.
